MAXIMIZING UNDERCARRIAGE REPAIR DOLLARS?

— WACO —

HOLT CAT®'s Waco repair capabilities will help you manage your undercarriage system maintenance.

LOCAL UNDERCARRIAGE REPAIRS FOR LOCAL CONTRACTORS

THE UNDERCARRIAGE IS THE LIFEBLOOD OF YOUR MACHINE

Undercarriage maintenance costs can consume over 50 percent of the maintenance budget on your track machines. When you partner with HOLT CAT® to manage your undercarriage, we will help you reduce downtime and operating costs, while dramatically increasing uptime and productivity. With proper management, machine undercarriage components can deliver maximum performance.

UNDERCARRIAGE SOLUTIONS FOR CAT MACHINES

HOLT CAT has invested in the necessary personnel, training and tooling to ensure that we are your best choice for Undercarriage repairs. Dedicated, trained and knowledgeable shop and field service undercarriage technicians are committed to timely repairs. At our Waco undercarriage facility we offer repair options that include wet pin and bushing turns to Cat specs, re-grousing, link and idler rebuilding plus the necessary testing to ensure every repair is complete. You can count on undercarriage repair and maintenance programs from our Waco location to keep your productivity on track.

UNDERCARRIAGE SOLUTIONS FOR ALL BRANDS

In addition to repairing Cat undercarriage, HOLT has the capability and experience to perform in shop or field repairs on all sizes and brands of undercarriage, including tracks for cranes.

EXPERTISE IN THE FIELD

Highly equipped undercarriage field service trucks, complete with mobile track press tooling, can be dispatched from Waco to any part of Central Texas to completely perform most undercarriage repairs or rebuilding, in the field. Many times, this is the quickest solution for a quality repair that has you up and running with limited delay.

SAFETY IS OUR CULTURE

With safety as a priority, all HOLT field service technicians maintain the necessary training and qualifications to access job sites regulated by MSHA and are familiar with what it takes to adhere to safety and compliance regulations while performing field undercarriage repairs.

UNDERCARRIAGE EXPERTISE AT OUR WACO STORE

HOLT's brand new dedicated Waco Undercarriage facility can rebuild links and re-grouser track shoes. If you have a track roller frame that needs to be straightened, realigned or rebuilt, HOLT can take care of it. A computer guided 385 ton track press enables HOLT undercarriage technicians to efficiently turn or replace pins and bushings for D3 to D11 sized Cat and non-Cat undercarriage systems. A torque selection machine with extreme down force capability greatly increases track removal efficiency, facilitates worn bolt removal and decreases bolt damage, resulting in lower cost for replacement hardware.

UNDERCARRIAGE PARTS AVAILABILITY

An extensive inventory of new Caterpillar replacement parts and a stock of on hand exchange track rollers and idlers for select machine models helps to shorten the repair time.

There is no undercarriage repair that HOLT cannot perform.
