

# Cat<sup>®</sup> Product Link

**Only one equipment monitoring service has you linked to a world-class dealer network.**

Cat<sup>®</sup> Product Link enables convenient remote monitoring of your equipment. Get information you can use—with the support of your Cat Dealer—to keep your jobs on schedule, maintain machine health and reduce the costs of owning and operating your fleet.

**CATERPILLAR<sup>®</sup>**

# Keep your machines operating in the field with Product Link and the support of your Cat® Dealer.

## **Simplified fleet management**

Product Link is a wireless solution that integrates equipment information along with Cat Dealer support to help you manage your fleet more efficiently than ever before.

## **Improve logistics**

Track all of your owned, leased or rented machines—regardless of brand or type—and increase machine availability.

## **Maximize uptime**

Keep your machines in peak operating condition with timely notification of system event and diagnostic codes, and other machine health indicators. Manage preventive maintenance and other service events with ease.

## **Monitor machine use**

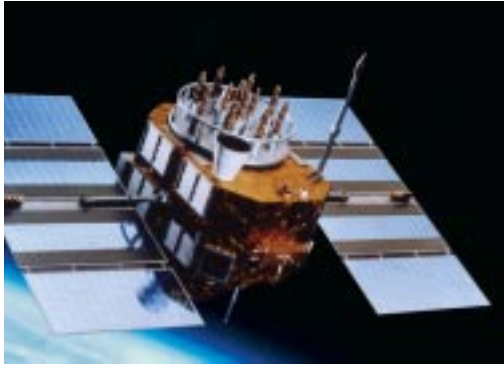

Know where your machines are and when they are being used. Product Link alerts you when machines operate beyond owner-identified time configurations and when machines move in or out of virtual geographic fences.

## **Reduce operating costs**

Keep your operating costs in check by avoiding inefficient usage, monitoring machine health and more. Maintain a complete repair history and help preserve the resale value of your equipment.

## **Link all machines, regardless of brand**

Product Link can be easily retrofitted on any Cat machine, or equipment from other manufacturers, by your Caterpillar Dealer.

Note: Health Watch information is dependent upon the machine model, year of production and Product Link model installed. Machines produced with electronic engines and transmissions equipped with Product Link model PL321SR normally can provide this information.

## The ultimate connection

Using wireless and satellite technology, Product Link hardware gathers and wirelessly transmits essential machine information.

Powered by Product Link, the EquipmentManager application allows you to search and categorize information by alert level, group, equipment ID, make and model.

EquipmentManager, a user-friendly, secure application hosted on your Cat Dealer's Web site, brings machine usage, maintenance and location information to your desktop, and can also send text-message alerts (for example, "A PM is due") in the form of email to a pager or cell phone.

Your Cat Dealer helps you manage the machine maintenance needs identified through equipment monitoring.

Materials and specifications are subject to change without notice. Featured machines in photos may include additional equipment. See your local Cat Dealer for available options.

## Linked to the most powerful dealer network in the world
